

# INTERNSHIP IN ORGANIC WINE ESTATE

## SOUTH OF FRANCE

In a small estate of 6ha of vines and a small winery, everyone touches everything. For an intern, it is the opportunity to learn the profession in all its dimensions.

The work in the vineyard is without plowing, treatments based on macerations, decoctions and infusions of plants (all homemade), whey, essential oils, propolis, in a continuous research to lead to the reduction of the use of copper and sulfur.

The winemaking work is done with the least possible intervention, with maximum hygiene, attention and safety. Our cellar is small but functional and modern, to allow us to make sincere and stable wines, while respecting the grapes and the humans who work them.

Trade is as important as the other aspects for us. We know each of our customers, there are many visits, tastings, meetings.

Life in our domain is intense and rich.

We are looking for enthusiasm, versatility, respect and desire to learn.
